

# JPT License

## User's Manual

---

JPT License is a software tool to maintain licenses for the Jura Personalization Toolkit. The licenses are stored in the internal memory of the HASP HL hardware keys, contains:

- Expiry date
- IPI/LS generating counter
- Hardware key and customer IDs

With JPT License Jura can remotely extend the validity of the key.

### Quick Guide

1. Plug the dongle and start JPT License
2. Save Key Data file
3. Send the JKD to [personalization@jura.hu](mailto:personalization@jura.hu)
4. Jura is going to reply a Key License file
5. Activate the dongle with the received JKL file

## Before using JPT License

JPT License works on Windows 7/8.1/10 (32/64 bit), downloadable from:

[https://personalization.jura.hu/Utilities/JPT\\_License.zip](https://personalization.jura.hu/Utilities/JPT_License.zip)

The package contains:

- JPT License.exe
- User's Manual (this document)

The recent version works only with HASP HL dongles. On Windows XP and for old, HASP4 dongles use the old version: [https://personalization.jura.hu/Utilities/JPT\\_License\\_2\\_5.zip](https://personalization.jura.hu/Utilities/JPT_License_2_5.zip)

Before executing *JPT License.exe*, do the following:

1. Insert the Jura HASP HL hardware key to the PC.
2. Download, decompress and run *JPT Runtime Installer* :

[https://personalization.jura.hu/Utilities/JPT\\_Runtime\\_Installer.zip](https://personalization.jura.hu/Utilities/JPT_Runtime_Installer.zip)

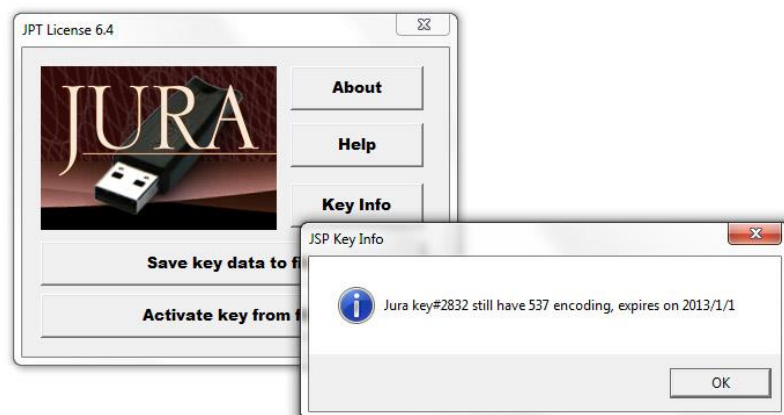

The installer contains the essential Microsoft and HASP drivers.

## Verify license status

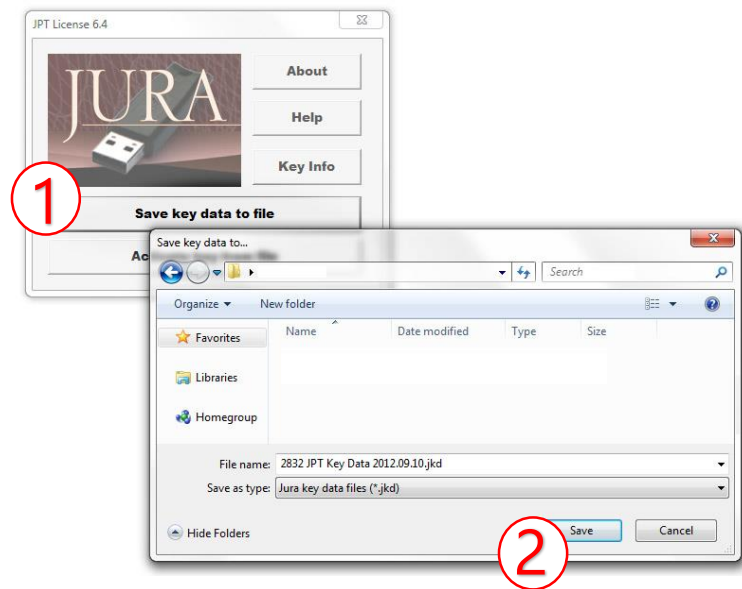

To see the current status of the license, just click on key info.

Note, if the counter is over 1million or the dongle is not activated yet, counter and/or expiry date is not shown.

## Using JPT License

1. With our tool, *JPT\_License.exe* saves the current status of the dongle into a Key Data (JKD) file.

2. **Important!** Do not use the dongle from now, best to unplug to be sure! Otherwise it can't be activated with the new license.
3. Send the JKD to [personalization@jura.hu](mailto:personalization@jura.hu). We are going to reply a new license (.JKL) file.

4. (Plug +) activate the key with the license. Now you can continue using it.
